

OFFICINA

Con "Officina" Axis Cucine rinnova completamente la propria proposta commerciale moderna proponendo una collezione che raccoglie, reinterpreta e supera i precedenti best-seller Tempera, Tabula e Plana di cui "Officina" sarà la naturale evoluzione. Grazie alla collaborazione del ns. Ufficio Ricerca & Sviluppo con importanti designers del settore si è riusciti a confezionare una proposta ricca di novità e contenuti.

Con il nuovo programma "Officina" sono state rianalizzate le finiture e gli spessori già in gamma e selezionate numerose nuove finiture e tipologie di ante per una proposta complessiva di n.150 possibili scelte, tra ante lisce (Flat) e a telaio (Frame). Le finiture spaziano dai materiali più tecnici e convenienti come i melaminici e i pvc ai materiali più nobili come legno, vetro e cemento.

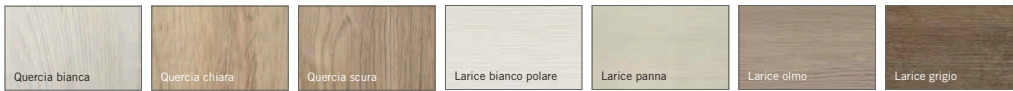

With its new range "Officina", Axis Cucine renovates its business offer for modern kitchens and introduces a collection that gathers, reinterprets and turns into the natural evolution of the previous best-sellers: Tempera, Tabula and Plana. Through the collaboration of our R&D Department and important designers of the sector, we have managed to create an offer full of innovation and contents. In the new "Officina" programme we have re-examined the finishes and thicknesses of the previous models and we have selected new colours and materials for a total choice of 150 finishes for Flat and/or Frame doors. These finishes include both technical and cheap materials, such as PVC and melamine doors, and noble materials, such as wood, glass, and concrete doors.

Par la nouvelle gamme "Officina", Axis Cucine renouvèle complètement son offre commerciale moderne en proposant une collection qui ressemble, réinterprète et dépasse les best-sellers précédents, c'est-à-dire Tempera, Tabula et Plana, dont "Officina" sera l'évolution naturelle. Grâce à la collaboration entre notre Bureau de Recherche et Développement et d'importants designers du secteur nous avons créé une proposition pleine de nouveautés et de contenus.

Dans le nouveau programme "Officina" nous avons réexaminé les finitions et les épaisseurs de la gamme précédente et nous avons sélectionné de nouvelles finitions et plusieurs types de façade, pour une offre totale de 150 choix possibles, entre façades lisses (Flat) et façades avec cadre (Frame). Ces finitions incluent des matériaux techniques et économiques comme le mélaminé et le polymère, ainsi que des matériaux plus nobles comme le bois, le verre et le béton.
