UN IMPEGNO PER L'AMBIENTE

Nel valutare e scegliere la rubinetteria per il tuo bagno non è più possibile sottovalutare l'importanza dell'aspetto ecologico: è una questione di rispetto verso l'ambiente.

Con i miscelatori a risparmio energetico e idrico è possibile ridurre notevolmente lo spreco di acqua e di energia perché intervengono sui due aspetti fondamentali colpevoli: la portata e la temperatura.

Gaboli ha introdotto in tutti i suoi miscelatori la possibilità di scegliere cartucce **ECOWATER** con regolatore di portata, ed **ECOSKIMP** che forniscono acqua fredda in apertura.

A COMMITMENT FOR THE ENVIRONMENT

Choosing bath for your bathroom, you should consider the importance of the ecological aspect, of the environment respect.

With saving energy mixers, it is possible to save water and consumption, acting on two fundamental aspect: the flow and the temperature.

Gaboli offers the possibility to choose **ECOWATER** cartridge (to regulate the flow) and **ECOSKIMP** cartridge (to supply cold water in opening position) for all mixers.

ECOWATER

Nella cartuccia **ECOWATER**

la manopola ha due posizioni di apertura: al primo blocco si ottiene un flusso di acqua ridotto del 50%, mentre per avere più acqua è necessario vincere una resistenza e creare un'apertura più ampia.

The **ECOWATER** cartridge has two opening positions: at the first block we can save 50% of the water flow. Differently, to have more water, it is necessary to rise the lever more in a wider position.

La cartouche **ECOWATER** a deux positions d'ouverture: au premier arrêt, on obtient un débit d'eau de 50%; par contre pour obtenir un débit total, il est nécessaire de lever le levier au maximum.

UN ENGAGEMENT POUR L'ENVIRONNEMENT

En évaluant et en choisissant les robinets pour votre salle de bain, il n'est plus possible de sous-estimer l'importance de l'aspect écologique. Avec les mélangeurs d'économie d'énergie et d'eau, il est possible de réduire considérablement le gaspillage d'eau, parce qu'ils interviennent sur deux aspects fondamentaux: le débit et la température.

Gaboli a introduit dans tous ses mélangeurs la possibilité de choisir des cartouches **ECOWATER** avec réglage du débit et **ECOSKIMP** qui fournissent de l'eau froide lors de l'ouverture.

ECOSKIMP

La cartuccia ECOSKIMP fornisce acqua fredda all'apertura con la leva in posizione centrale. Questo evita la richiesta di acqua calda alla caldaia con il conseguente risparmio di energia.

*The **ECOSKIMP** cartridge supplies cold water with the lever in central position. This avoids the request of hot water and permits to save energy*

La cartouche ECOSKIMP fournit de l'eau froide lorsque le levier est en position centrale. Cela évite le besoin d'eau chaude et permet une économie d'énergie.
